

Ambo University is tasked by the Government of Ethiopia (Ministry of Urban Development and Construction, Integrated Urban Development and Management Project Office) **and the Oromia regional state** (Integrated Urban Development and Management Office) **to run undergraduate and critically needed human resource at different levels for the rapid implementation of modern urban land administration and management plan** that the government has designed. In this regard **we are already in a decision to launch at least two or three undergrad programs in Urban Landuse Planning and Cadastral Surveying and Geomatics** (and possibly Land administration and management) **in the coming academic year** and build from there to other programs especially the postgrad programs.

We need particularly experienced professors and researchers in the fields:

- 1. Urban Land use planning**
2. Land Administration and Management
3. Cadastral Surveying
4. Geomatics
5. Geoinformatics
6. GIS and Remote Sensing
7. Urban land and real estate economics
8. Urban Property and Land Law
9. Geodesy/Geomatics
10. Urban Land Property Valuation
11. Land Policy
